get started:

Edwards Lifesciences is the leading global structural heart innovation company, driven by a passion to improve patient lives.

Our **Clinical Graduate Program** equips you with hands-on experience in the dynamic world of transcatheter mitral and tricuspid therapies, including device handling, implantation techniques, and troubleshooting. As part of the Field Clinical team, you'll collaborate with clinical professionals to deliver patient-focused therapies. We're looking for compassionate and curious individuals inspired by our meaningful work, collaborative culture, and spirit of innovation.

Program start dates occur in April and October, with each cohort embarking on a 12-month period of hands-on clinical experience and professional development.

Edwards

About our program

Our Field Clinical Specialists are responsible for helping healthcare professionals and are present in cath labs during interventions. Read more on the benefits of joining the Clinical Graduate Program and how you can make an impact on patient lives.

Learn insights into both commercial and clinical environments

Collaborate with healthcare professionals and industry experts

Strengthen your technical skills with hands-on training and workshops

Acquire practical experience by working in various clinical settings

Benefit from personalized guidance and mentorship from senior leaders

Develop effective soft skills such as cath lab conduct and communication

What you'll need (Required)

- Recently graduated (2025/2026) with a bachelor's or master's degree in Biomedical Engineering, Clinical Engineering, Clinical Physiology or related study
- Proficiency in English and German
- Strong teamwork and communication skills
- Willingness to commit to a 12-month program
- Possession of a valid German driver's license and willingness to travel across Germany and internationally
- Living within a commutable distance of Munich, Germany

About transcatheter mitral and tricuspid technology

Supporting the mitral and tricuspid valves of the heart, these therapies offer unique solutions to help unmet patient needs.

Join our team at Edwards as we continue to pioneer these patient-focus technologies.
