

Working Student (m/f/d)

Working Student (m/f/d) – CT Pre-Development

To support our team in computed tomography (CT) pre-development, we are looking for a working student (m/f/d) from a scientific/technical background (e.g. physics, mathematics, medical engineering or similar). You will assist in analyzing and addressing technical issues related to CT systems as well as in implementing smaller software/scripting tasks, e.g. for evaluation, automation, or prototyping.

Your Profile

- Currently enrolled in physics, mathematics, medical engineering or a similar degree program
- Initial programming experience and interest in software-based solutions
- Desirable: knowledge of Python, MATLAB, C# or C++
- Analytical thinking, structured working style, and ability to work in a team

If you are interested, please send a brief letter of motivation outlining your skills, along with your resume, to the contacts listed below.
